IAC-M-39
9 August 1951

Approval of Minutes

1. Action: The minutes of the meeting of 2 August 1951 (IAC-M-38) were approved.

Enemy Capabilities for Attack on the United States

2. Action: The Service members of the IAC were requested to obtain, through such informal means as are appropriate, the advice and assistance of the Joint Staff Planners in developing the estimate of U. S. capabilities to repel attack (Item 3 b of IAC-M-38). It was noted that the estimates to be prepared by the IIC and the ICIS had been largely completed.

Consequences of the Signature of the Japanese Peace Treaty and a U. S.-Japanese Security Pact

3. Discussion: General Smith raised the question of the possibility of war upon the signature of the peace treaty with Japan and read a memorandum from the Deputy Secretary of Defense requesting an estimate of Soviet reaction to the publication of the terms of the U.S.-Japanese security pact under three alternative time possibilities. Preliminary consideration of all sources of intelligence by the members led to the general conclusion that although Soviet capabilities were currently being enhanced at a rapid rate, no positive intention to resort to war at this time was discernible. It was believed that the timing of the announcement of the terms of the security pact would have no effect on a Soviet decision to go to war. In the preparation of the final statement, however, attention should be given to the possible psychological advantages accruing to the Soviets at the respective dates. The Secretary was directed to call Mr. Lovett's paper to the attention of Mr. Gray of the PSB for their information and action as appropriate.

Probability of an Early Assault on Japan

4. Action: It was agreed that the IAC representatives would meet on 9 August 1951 and revise the paper to take full account of the Watch Committee Report of 8 August and pertinent psychological factors. The resulting paper will be issued as a TOP SECRET SE with an indications annex, if appropriate.

9 August 1951

Fabrication and Duplication
of Intelligence

5. Action: General Smith requested the members to give serious attention to the problem of fabrication and duplication in intelligence sources and the means of meeting the problem, taking into account presentation of this problem in a particular area.
